

20 | LEADERSHIP 26 | CONFERENCE

Andrea Buxton

MSN, FNP C, APNP

**Clinical Director and Family Nurse Practitioner
Hemophilia Outreach Center**

Andrea joined HOC in 2014 as a Nurse Coordinator, providing comprehensive care to patients with bleeding disorders. In January 2023, Andrea became HOC's first Family Nurse Practitioner and it's only full time, onsite hemostasis provider. Additionally, she assumed the role of Clinical Director in 2025, where she oversees many of the day-to-day clinical operations.

Since joining HOC, Andrea has led multiple clinical and program initiatives, including the administration of post-FDA approved gene therapies for patients with Hemophilia A and B, leading HOC to be the first in the world to deliver commercial Hemophilia B gene therapy product.

Andrea is actively engaged in regional and national professional leadership. She currently serves on the Region V West Regional Council, is Co Chair of the Region V West Gene Therapy Working Group and is a mentor for the National Bleeding Disorders Foundation Advanced Practice Provider Mentorship Program. In addition, she contributes to several national bleeding disorder planning committees. She is also one of a small number of providers that has achieved Board Certification for Hemostasis Nursing.

Prior to her work at HOC, Andrea built a strong clinical foundation as an ICU nurse and hospital supervisor at St. Mary's Hospital in Green Bay, Wisconsin.
